*The Lecture Brief: CPD For Housemen on Organ Donation was written by Dr Hirman Ismail, Principal Assistant Director of Transplantation Unit, Medical Development Division, Ministry of Health Malaysia * Datin Dr Fadhilah Zowiyah Lela Yasmin Mansor, Head of Department, National Transplant Resource Centre, Hospital Kuala Lumpur * Dr Muhammed Anis Bin Abd. Wahab, Clinical Manager, National transplant Resource Centre, Hospital Kuala Lumpur*

*The Lecture Brief: CPD For Housemen on Organ Donation was reviewed by Datin Dr Sivasakthi Velayuthapillai, Head of Service (Anaesthesia & Intensive Care), Ministry of Health * Dr Sabariah Faizah binti Jamaluddin, Head of Service (Emergency & Trauma), Ministry of Health * Dr Rohaizat Yon, Deputy Director (Medical Profession Development), Medical Development Division*

Strategic Plan Organ Donation Awareness (ODA) was developed by the Transplantation Unit of the Medical Development Division, Ministry of Health Malaysia. The strategic plan consists of 6 main strategies; **ODA Strategy 1:** Targeting younger generation to achieve long term change in perception and attitude while acknowledging the importance of wide spread campaign in general population, **ODA Strategy 2:** Establishing and enhancing mutual collaboration with partners for better and wider coverage of campaign. Partners constitute Government Agencies, Government Linked Companies, individuals, private sectors and non-Governmental Organisations (NGO), **ODA Strategy 3:** Enhancing organisational structure for more coordinated, sustainable, efficient and effective programme implementation, **ODA Strategy 4:** Addressing misconception on organ donation especially from religious and cultural perspectives, **ODA Strategy 5:** Promoting the use of media (main stream and alternative) for dissemination of information, **ODA Strategy 6:** Improving awareness and establishing better commitment of healthcare personnel in promoting organ donation.

LECTURE BRIEF: CPD FOR HOUSEMEN ON ORGAN DONATION

Instructions: This Lecture Brief serves as a guide for house officers to conduct a Continuing Professional Development (CPD) session on "organ donation". House officers are expected to do their own research on the topic as outlined by this Lecture Brief. House officers may also consult a moderator appointed by the Department to conduct the session.

Introduction

The increasing prevalence and incidence of end stage organ failures especially kidney failure has further increased the disparity between demand and supply of organs in Malaysia. As a healthcare professional, it is important for us to understand the issues involved in organ donation and transplantation to enable us to assist in addressing the problems. It is also important to understand the implications of these issues including from ethical point of view.

Title

The title of the CPD session is "Organ Donation: The Basic". This is part of CPD list in i) **Anaesthesia** or ii) **Emergency Medicine** posting.

Structure of the Session

Presentation	30 – 45 minutes
Discussion	15 minutes

Depending on time and availability, relevant video clips can be displayed at the end of the session. Materials can be obtained from the National Transplant Resource Centre (contact details below).

Objectives of the CPD:

1. To deliver basic concepts of organ donation
2. To acknowledge the importance of organ donation
3. To understand that organ donation is the right of the patient
4. To understand basic procedures involved in organ donation
5. To understand that organ donation is part of end of life care
6. To understand procedure of referral of potential cases

Outline of the lecture:

1. Definition of organ/tissue donation and transplantation
2. The importance of organ donation
3. Brain death
4. Criteria of potential cases
5. Procedures of referral of potential cases
